### **Abstract**

Using data from the U.S. Department of Agriculture on the Production Flexibility Contract (PFC) acres enrolled for fiscal year 1996, the authors calculated the payment rates by bushel, acre, and state. The total payments by state under the 1996 FAIR Act were also calculated. Figures given in this paper provide a comparison by state and commodity.

## PRODUCTION FLEXIBILITY CONTRACT PAYMENTS: FISCAL YEAR 1996

Production Flexibility Contract (PFC) acres enrolled for fiscal year (FY) 1996 were released by USDA on August 19, 1996. From these data, and from what we know about the payment stream, we calculated the payment rates by bushel, acre, and state. Total payments by state under the 1996 FAIR Act were also calculated. These figures provide a comparison by state and commodity.

Iowa had the fifth highest enrollment rate with 99.4 percent of the eligible acres enrolled. North Dakota led the nation with 99.7 percent enrolled and Pennsylvania had the lowest at 91.6 percent. The highlights of selected states are in Table 1. Iowa ranks third in total payments at \$346 million, behind Texas (\$513 million) and Kansas (\$429 million).

Table 1. Estimated 1996 PFC payments, selected states

Penn.	18.02	17,951	96	91.6
R.I.	17.67	23	1	94.5
Texas	26.91	513,317	19,078	99.0

Note: Values may not sum to the total due to rounding.

Iowa also ranks behind other states in payments per acre due to commodity mix and to high payments per acre for cotton and rice. Arizona has the highest average payment per acre because more than half of enrolled area is in cotton with a \$97 payment per acre. California, with both cotton and rice enrollment (rice payments are \$160/acre), ranks second in average payment per acre enrolled.

By commodity, the national average payment per acre in order from highest to lowest are: rice (\$113), cotton (\$46), wheat (\$26), corn (\$22), sorghum (\$16), barley (\$13), and oats (\$1).

For corn PFC payments, Iowa, with the seventh highest program yield, has the seventh highest payment per acre (\$24) as well (Table 2). Because it has the highest program yield of 126 bushels per acre in the country, Arizona receives the highest corn payment of \$26 per acre.

Table 2. Estimated Iowa PFC payments and acres in FY1996

	PFC Payments			Area Enrolld

<b>Total</b>		<b>23.46</b>	<b>346,444</b>	<b>14,767</b>	<b>99.4</b>
<b>National Rank</b>		<b>21</b>	<b>3</b>	<b>4</b>	<b>5</b>

Note: Values may not sum to the total due to rounding.

Ninety-five percent of Iowa's PFC payments are derived from corn program history. The corn FY1997 per bushel payments should go from \$0.24 to \$0.47. So total PFC payments are estimated to double next year to Iowa contract holders.

Although Iowa was not the national leader in the categories listed, the state compares quite well in total payments and payment per acre within the Corn Belt. In addition, FY1997 payment rates for corn will be higher, indicating continuation or improvement in Iowa's PFC payment ranking.
